Double Oven

PRODUCT BENEFITS

So what does IOI™ really mean?

IOI™ is a genius computer that makes the oven so easy to control you won't need a manual to use it. No more of those controls, applications and knobs that become so confusing even the clock is left unset.

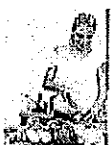

Easy Cleaning.

Easy wipe enamel, full width glass removable doors / shelves / knobs, one piece oven liners and spill safe hobs are all standard on our cooking range. The oven also features a split grill that can be washed in a dishwasher, curved interior

Quiet, quick and efficient

Even with fan assist, kitchen conversations can flow naturally. And energy use is also minimised, meeting Europe's highest energy standards (EN50304).

Intuitive by design.

In order to make cooking simpler we watched how people use their ovens in real life and learnt from chefs who use programmable cooking. By doing so we have removed complexities, and designed our ovens to be intuitive to use. We call this IOI™.

Ceramic Cooktop EHET66CS

Electrolux E:Line Ceramic Cooktop

Ceramic Cooktop
EHET66CS

PRODUCT BENEFITS

Easy to Navigate and Use

Simple touch controls at your fingertips make it easy to control the heat allowing you to concentrate on preparing the perfect meal. The Stop + Go function allows you to "Pause" cooking.

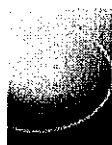

Sleek and Stylish Design

The black ceramic electric cooktop gives the same sleek, stylish finish as the induction cooktop. It blends the traditional convenience of an electric cooktop with the unified look of the Electrolux E:Line collection.

Easy Clean Ceramic Surface

The smooth black ceramic surface is tough and durable while being easy to maintain. Being a completely flat surface maximises the use of cooking space.

Flexibility and Control

In addition to the four cooking positions, one element is a triple zone cookplate, giving you the flexibility of 3 variable hotplates in one.

PRODUCT FEATURES

4 cooking zones including one triple zone
